- Proactive & Initiative
- High Efficiency
- Adaptability

### Languages

- Kyrgyz — Native
- Russian — Fluent / Professional
- English — Elementary

### About Me

I am a goal-oriented young Full Stack developer interested in modern technologies. After completing the 11th grade, I entered the IT industry and managed to accumulate 1 year of experience. I perform qualitatively not only the visual design of the site, but also its technical (code) part. I have the ability to get work done quickly and efficiently by working with artificial intelligence (AI) and writing effective prompts.

### Professional Experience

#### Work Experience and Projects:

- Personal projects (Portfolio)
  - Telegram Bot: A bot created to communicate with users and automate certain functions.
  - Link: [t.me/hhh5678hhh\\_bot](https://t.me/hhh5678hhh_bot)
- Personal Website: A responsive website that introduces my services and portfolio. Link: (Site coming online soon)

#### Educational background:

- Language Academy KK (Kyzyl-Kiya.)
  - Course: Full Stack Web Development (4-month intensive course)
    - In this course, I learned the basics of web programming, building complex structures and working in a team.
  - Information about the training center: [Language Academy Instagram](#)

#### Why should you choose me?

- Modernity: I work with the latest technology and AI tools, not old ways.
- Speed: Being young and energetic, I quickly master new tasks.
- Comprehensive approach: I know the process from design to full implementation of the site.
